## Making the Right Choice

Our pledge is to serve each resident with kindness, respect, compassion and professionalism. While we encourage our resident's independence, we will be nurturing their spirit, preserving their dignity and involving their families. The foundation of our program is based on our theory that the quality of life for a person can be significantly improved by creating an environment that allows individuals daily life choices. We believe that proper training, ongoing education, and specialty enhancement programming are the key ingredients to ensuring excellence in care.

Our main goal is to ensure that our residents and their loved ones can see the difference in the care received. We operate with the same philosophy throughout all of our facilities, namely, the provision of quality care with a "Family" touch.

*The choice to plan now is yours,  
but only with proper planning  
will the choice remain yours.*
